RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 68 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1840 Excerpt: . . . readings refer to the middle wire, and were obtained by observations made on Oct. 24, (1839) which shewed that since June of 1837, the coincidences had very slightly altered. They are therefore adopted for the comet observations. It was not thought worth while to take account of a minute deviation of the wire of micrometer L from parallelism to the fixed wire. The other is as nearly parallel as possible. The value of one revolution of each micrometer is always 33, 400. The differences of N. P. D. in column 12 require to be further corrected for refraction and parallax. The Observations of Enckes Comet on the Meridian, in pages (65) and (66), require little explanation in addition to that contained in the appended notes. The intervals from the middle wire to the meridian in the observations of R. A. with the Circle, were obtained by first deriving from the second column of intervals in the Table of p. lxviii, the errors of the Circle in collimation, m level, and azimuth, and then calculating the three corrections for each observation in the same manner as for Transit observations. The interval for the single observation of the comet with the Transit on Oct. 29, was calculated from the known errors of position of the Transit at that time. The apparent N. P. D. of the comet in page v66) are uncorrected for either refraction or parallax. All the comet observations are numbered for future reference in the...
