The Primal Code is based on the behavior of a corporeal primal atom split out of zero with an adverse twin atom. It lays out a handful of principles on how and why a primal particle with no inherent internal qualities (except its relation to zero) can cause identical random splits. The primal atom is all there is. It has no energy in any sense of the word. By splits, it can proliferate and gather in clouds but, as the smallest Universal unit, it cannot project any external effect across a void. It does however have a...
